Guidelines For Custom ArtScreen Artwork

1. A signed "Artist's Release Form" must accompany all custom art that is copyrighted, registered or signed before it can be legally reproduced for ArtScreen. The form is available at <http://www.vutec.com/artscreen/artist-release.pdf>
2. There is an additional charge when using custom artwork for the ArtScreen.
3. Vutec will not accept original artwork. Contact a local photography studio to have the artwork professionally photographed.
4. Vutec will send a proof of the custom artwork after receiving the artwork and color-matched print. Compare the proof with your original artwork. If the proof is acceptable, sign the release form and mail back to Vutec.
5. Vutec will create the finished ArtScreen from the signed, returned proof.
6. Vutec must receive a CD with the digital file that meets specifications and a color correct print of the original artwork.
7. Vutec will accept film negatives if they meet specifications and come with a color correct print.
8. If we scan your film negative additional fees may apply.
