

SILVERSTAR*

Beveled Frame Wall Screen

SilverStar™ is Vutec's patented front projection screen that delivers the ultimate in picture quality. This award winning screen provides high brightness, vivid colors, high contrast and a 180 degree viewing area, putting it in a class by itself as a truly revolutionary high-definition screen.

SilverStar's superior performance begins with its innovative, patented technology—a silver-based material combined with multiple optical layers to provide a gain of 6.0. This state-of-the-art technology increases color saturation while expanding contrast in controlled or uncontrolled lighting environments.

SilverStar is custom made to order and can be multi-plexed for large theaters. With unsurpassed versatility, SilverStar is the screen of choice for home theater systems, retail displays, command and control, religious and educational venues.
